Languages, traveling, acquaintances with people of different cultures.

Frankfurt, 2025-10-01

Michael J. Mutz

Explanation of Diploma „DEA en Electronique“

In the French university system, the DEA takes place as a graduate program that follows the undergraduate semesters („deuxième cycle“) and leads to a Ph. D.

The DEA education takes one year. It serves as a preparation to the Ph. D. formation or accompanies the student into his working life. The DEA is a pre-request to get the examination for a Doctor's degree.

Since the Université des Sciences et Technologies de Lille is a technical university in its German equivalent, the DEA en Electronique degree is equivalent to the German university degree **“Dipl.-Ing. (TU)”** and treated equally.
