## Application

### [ELECTRONIC]

[Michael.Mutz@EuropeanITC.eu](mailto:Michael.Mutz@EuropeanITC.eu)

Dear Sir or Madam,

I am currently enrolled in a further training to become an Expert in Cloud, Cyber Security and AI technologies until the end of 2025 and am looking for a permanent / freelance position starting in January 2026.

For the past 25 years, I have been working as a Java Expert (business analyst, designer, architect, developer, tester, operations, project manager) in Europe.

My most recent position was a Senior Project Manager in the global environment, working in the Transition Management. This involved merging several of the client's on-premises locations into a globally operating poly-cloud solution.

I am available for new projects starting 01.01.2026, possibly earlier by arrangement.

I am looking for a new professional challenge in the field of Cloud, Cyber Security and/or AI development, preferably with an international focus.

I came across your job description on your website. My profile may be a better fit for another of your job postings: please consider my application as an "unsolicited application".

I have enclosed the required personal application documents.

For further discussion, please contact me at  
[Michael.Mutz@EuropeanITC.eu](mailto:Michael.Mutz@EuropeanITC.eu) and  
49-151/28 24 90 67

I am looking forward to hearing from you as soon as possible.

Sincerely yours,

  
Michael J. Mutz

PS:

My current certificates and application documents can also be downloaded from my website [www.EuropeanITC.eu](http://www.EuropeanITC.eu) landing page.

## 2. SINCE 01.1999: CERTIFIED INTERNET ENGINEER

International / global experience (Near- und Offshoring) in the field of Java-JEE Sub- / Project Manager / Tech. Coordinator, Business Analyst, Architect, Developer, Tester, Operator and DevOps on Cloud Platforms (CloudComputing, Container Technology, Webservices) of Distributed Systems on BEA WebLogic / JBoss / Websphere and Oracle/DB2/MySQL;

Strengths in SAP, ABAP and in the administration of Web-/WAP Applications, Solaris-, Unix-, Linux-Systems, Win-Networking

Trilingual (DE, EN, FR);

Field / Role / Methodologies	Description
Technical focus on Java /JEE Software Development	JEE Architecture / Development / Project Management on Cloud Computing Platform Openshift With BEA WebLogic / JBoss / Websphere and Oracle / DB2 / MySQL; FrontEnd, MiddleTier und Backend; Cloud Computing, Container Technology, BPEL, WebServices, Hibernate, EJB, WAP, DesignPatterns,
Areas of Activity	Project experiece in national, international and global main areas of activity (Near- and Offshore Projects)
Roles	Projekt Management, IT-Controlling, Business Analysis, Design, Architecture, Development, Programming, Testing, Operations / Systems Administrator; Consulting and Training.
Methodology	OO-Software Engineering, Business Processes Analysis, OOADP with UML.
SAP and Non-SAP Technologies	SAP and Non-SAP: ABAP, SAP R/3: Data Warehouse (BW, BI, BW); Netweaver XI/PI, Netweaver Portal; SAP GUI, JCo 3, RFC
WebDesign	HTML, Java-Script, Typescript, Angular, JSP, Servlets, HTML, CSS, Ajax,

I've been working with common Java technologies and programming tools since 1999 and keep myself up to date through ongoing training.

I've also been working in the SAP environment since 2012.

Further details and my project history can be found at the following link:

## PERSONAL SKILLS

Skills	Description
strong communication skills in a global environment	I have strong communication skills in German and English language and am comfortable with situations where I need to present myself in meetings. I am customer-oriented.
Expert with a broad range of project positions	I have taken on a variety of roles in projects, so I don't consider myself solely a Java developer / programmer. In addition to my primary focus on architecture / development / programming of Distributed Systems, I am also active in Business Analysis, Design, Server Administration, Project Management, IT Controlling, and Training in an international / global environment. I work independently and require a minimum of guidance.
Self-starter	I am a self-starter, so I am used to quickly integrating into a team and quickly taking on work and responsibility, enabling me to support the team in achieving project goals. My work reflects determination, autonomy, reliability, and vision.

I am looking for challenging projects and positions within security / JEE technology within a company where I can contribute my experience and make a valuable contribution.

I am happy to work for the same company long-term, preferably in an international / global market environment.

## EDUCATION

### Studies

Universität, country	Education
Université des Sciences et Technologies de Lille (USTL), France	Study abroad Diploma: „Diplôme d'Etudes Approfondies (DEA) en Electronique („Master“)
University of Connecticut (UConn), USA	Study abroad and Internship
University of Applied Sciences, Regensburg, Bavaria, Germany	Study of Telecommunications; Diploma: „Dipl.-Ing. FH Nachrichtentechnik“ („Master“)

### Certifications

Institute	Certificate
Microsoft CompTIA EC-Council	Data and AI, Modern Workplace, Apps and Infrastructure; Security+, Pentest+; Certified Ethical Hacker;
Siemens-Business-Services	Certified Internet Engineer: „Systems Specialist for Online Publishing“.

Chamber of Commerce, Bavaria, Germany	Training Suitability Ordinance: „Training of Trainers“
University of Applied Sciences, Regensburg, Bavaria, Germany	Additional Qualification: „Sales Engineer“ and „Basics in Marketing“
University of Applied Science, Regensburg, Bavaria, Germany	Additional Qualification: „Medical Technology“

## SELF-PRESENTATION

### 2024 / 2025: 1-year Further Training for Cyber Security Expert in the Cloud Environment with Programming in Artificial Intelligence AI

In 2024/2025 I completed a 1-year training course to become a Cyber-Security Expert in the cloud environment with programming in AI

### 1999 to 2024: Java / JEE Expert

I have 25 years of experience working on distributed systems with J2EE in Java programming as a technical project manager, business analyst, designer, architect / developer, tester, operator and DevOps for web and WAP applications with the latest technologies such as Cloud, Cloud Native, Container and Cloud Solutions, Micro Services, Hibernate und ORM, SOA and REST WebServices / BPEL, EJB, SAP, ... mainly in the branches of telecommunications and banks.

#### From the years 2000 to 2015

I had been working as a front-end specialist for thin client technologies, mainly with the technologies JSP, Servlets, HTML, CSS, Ajax, JSF ...

#### From 2005 to 2015

I had been working as a full stack developer.

#### Since 2005

I have mainly been working as a developer and architect

#### In the 2020

I updated my knowledge in the frontend technologies. I took part in an Angular 9 and Typescript seminar, so that since then I have been working as a full stack developer again and working on single-page applications.

#### Mainly in the years 2004 to 2009

I took on roles as an operator in which I learned how to deal with Unix / Linux operating systems and to look after high-load Java EE applications in productive 24/7 operation. Support of 2nd and 3rd level support was included.

#### Since 2012

In addition to the topics in the Java environment, SAP topics have also been of interest since 2012, in which I have attended further training courses and gained project experience.

#### Generally

In addition to developing distributed JEE applications, I also took care of their security. Important components are the web service security as well as the implementation of authentication frameworks. The roles and rights principle is very important. Network security through SSH frameworks and communication security with the HTTPS protocol, with PKI cryptography with certificates are topics for this, as well as data encryption with X.509, CVC, SHA2 and RSA.

#### Since the year 2012

I have been working as a project manager in classic project management since 2012. In 2014 I took part in the PMI certification training course.

### Since the year 2016

I have been managing and controlling near- and offshoring development teams as a single point of contact (SPC). I have project experience on site in Germany, Austria, Switzerland, France and Luxembourg.

### In 2017

I took part in a "Certified Scrum Master" certification.

### In the year 2019

I took part in a Docker and Kubernetes seminar as well as an OpenShift seminar. In the same year I worked as a DevOps in the field of setting up cloud environments, support and further development of Docker and Kubernetes environments as well as CI / CD tool chains. Since then I have been working as a developer / architect on cloud-based and containerized environments.

### Since the year 2021

I am working in the Offshoring Transition Domain as Senior Project Manager in in the Truck branch. This is about transferring legacy systems to modern cloud infrastructure environments. This activity takes place in a global environment and requires bilingualism in English and German.

### In the year 2024 / 2025

I continued with a training as an Expert for Cloud-AI-CyberSecurity.

During my 25 years of activity as a developer and architect, I have developed more into an independent external service provider who, in addition to the conception (problem analysis and documentation), also takes on the implementation (determination and implementation of the solution). For this, I use the methods of classic (PMI) and agile project management (Scrum) to deliver the required solution in the required time, budget, and quality.

I keep my knowledge and expertise up to date through continuous training.

I am a self-starter and I am used to integrating myself quickly into a team, quickly taking on work and responsibility so that I can support the team in achieving the project goals. My work is an expression of determination, autonomy, reliability, and vision.

I have excellent communication skills and am familiar with situations in which I have to present myself in meetings. I work independently and confidently in my technical environment.

In addition to my mother tongue German - due to my studies abroad in the USA and France - I also speak fluent English and fluent French.

I am looking for challenging projects and positions in the field of J2EE technologies in a company, to which I can bring all my valuable work experience and thus contribute to the long-term commitment.
